

## EXCLUSIVE EMISSIONS CONTROL TECHNOLOGY SOLUTION

### UTILIZING OE COMPONENTS TO DELIVER LASTING PERFORMANCE

As a leading supplier to global vehicle manufacturers, Walker® Ultra® catalytic converters are available in direct-fit and universal designs for OBDII vehicles. Each Walker Ultra converter includes a high-technology washcoat and the optimal loading of precious metals for the corresponding application. Walker engineers design each direct-fit converter to include the precise combinations and

characteristics of components to deliver OE-style, fit, sound and performance for every application.

Walker emissions control products are application-specific and include OE-style pipe routing, flanges, hangers and enhanced heat shields, to help provide trouble-free performance while allowing for quick and easy installation.

#### PART NUMBER

### WALKER ULTRA DIRECT-FIT CATALYTIC CONVERTERS #16577, 16581 & 54626

#### APPLICATIONS AND ADVANTAGE

Walker Ultra catalytic converters, such as part numbers #16577, #16581 and #54626, feature OE-style, vehicle-specific components for a more precise fit and longer service life.
